What should I already know?

- That there was life in Armley during prehistoric times
- That Britain has changed significantly over time
- That life in Victorian Britain was very different to modern Britain

The Industrial Revolution

- A period of huge change in Britain between 1750 and 1900.
- Before the Industrial Revolution, Britain was a rural country, most people lived off the land with livestock.
- People began to realise that coal and steam could be used to power factories, large machines, flour and cotton mills. This reduced the time it took to make something and increased the amount that could be made and so the Industrial Revolution began.
- Huge factories were built and towns expanded.
- People would migrate to the towns attracted by reliable work and pay from the factories.
- Houses for workers were built closer to the factories.
- Better transport links helped boost trade by transporting people and goods quickly and cheaply all across the country.

Vocabulary
